ABOUT US

“Shaping the future together.”

Actech Tools offers a wide range of precision cutting tools in the field of milling, turning, drilling, threading, tool holder and boring in the field of metalworking. With our 15 years of experience in the industry, we develop special solutions for our customers for the complete processing of building parts used in the general mechanical engineering, aerospace industry, automotive, molding, dental and energy sectors.

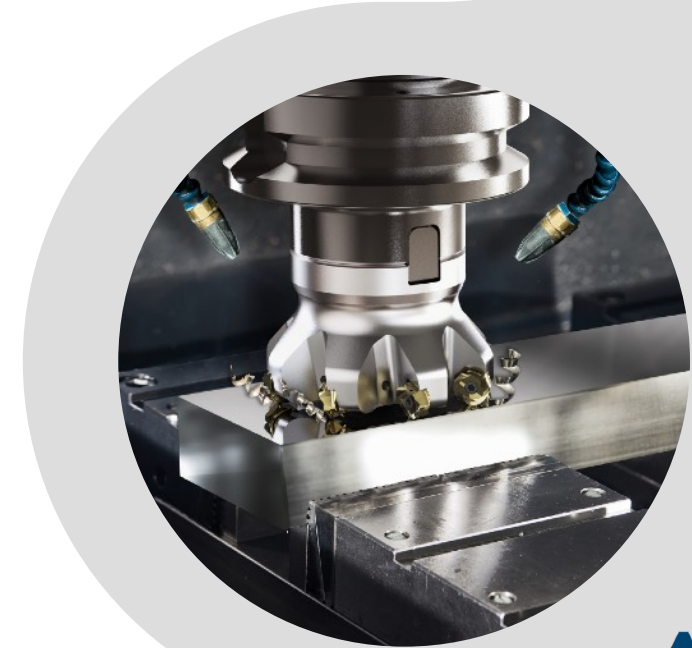

Another aspect that we see as our difference is to introduce our customers to brands that they have not used before but that we are very confident about their efficiency. In this way, we want to enrich the product diversity in the sector and contribute to our customers to be competitive in their own markets' by adding efficiency.

15+
YEARS EXPERIENCE

100000+
DIFFERENT PRODUCTS

MISSION & VISION

We always want to
be our customers “preferred” supplier.

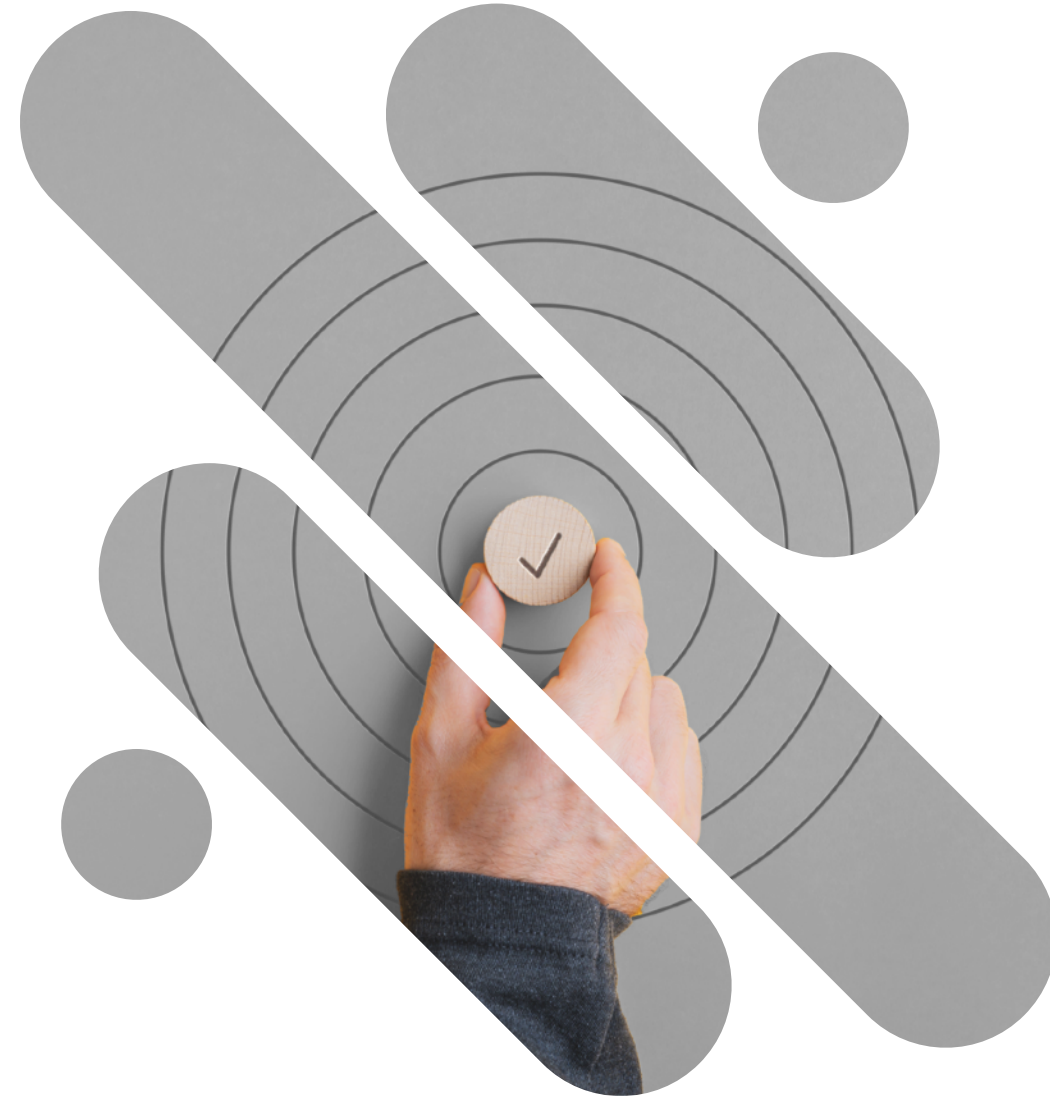

MISSION

It is to be a service-oriented company that combines quality with an affordable price and responds quickly and effectively to the expectations and requests of customers.

VISION

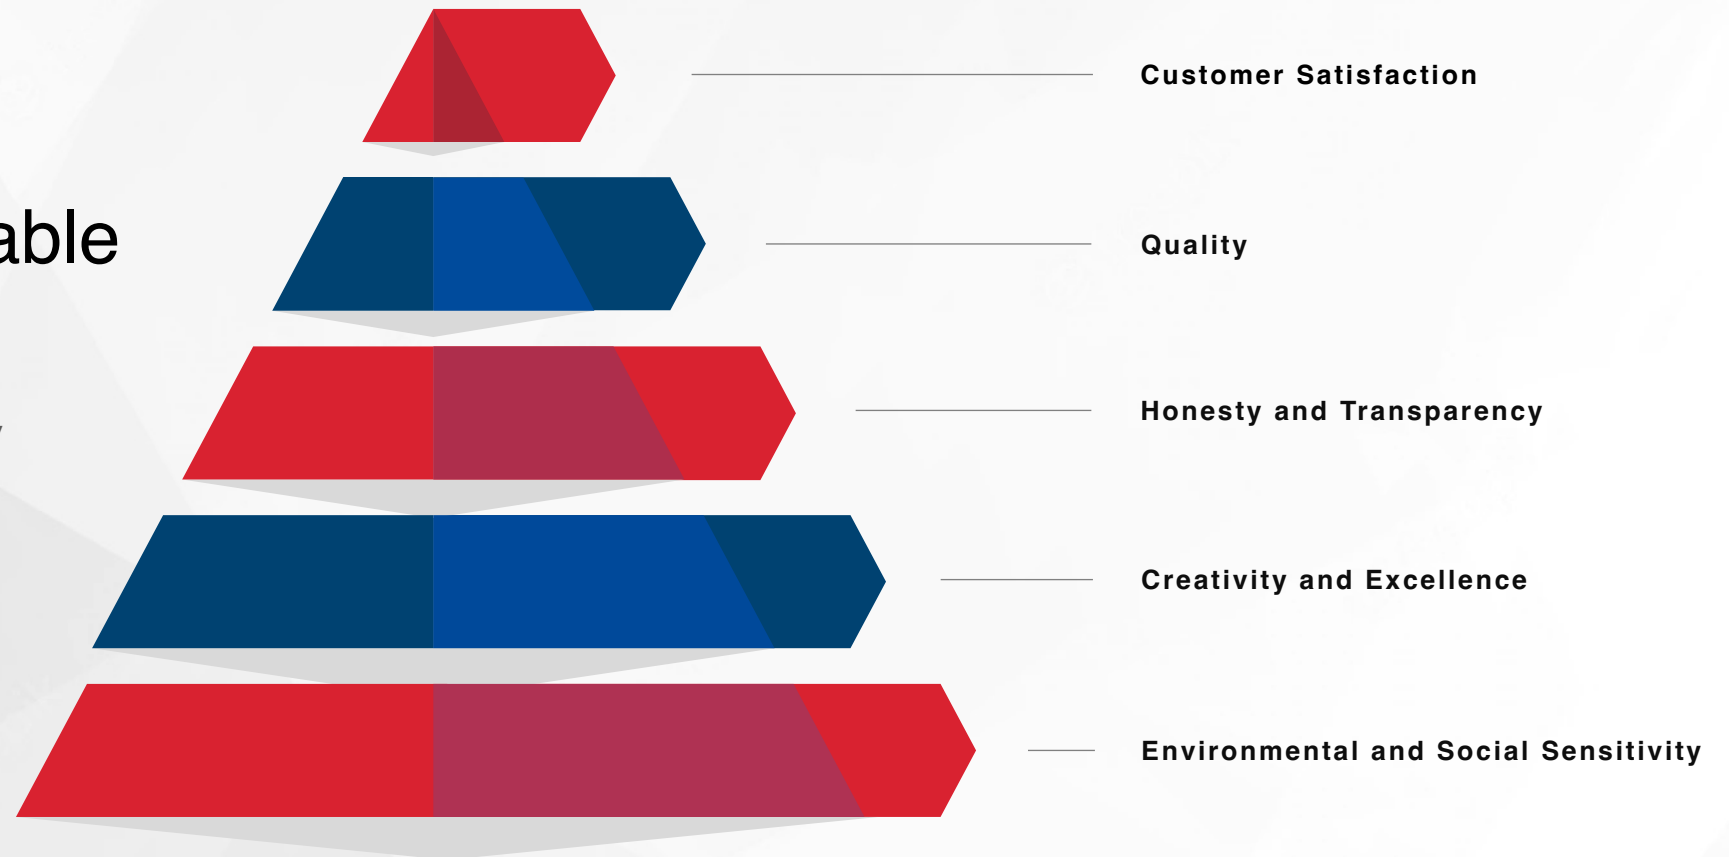

To increase the company's value in an integrated way with brand awareness due to continuous and balanced growth, to keep the domestic and international customer satisfaction at the forefront by providing quality and zero-defect products.

OUR VALUES

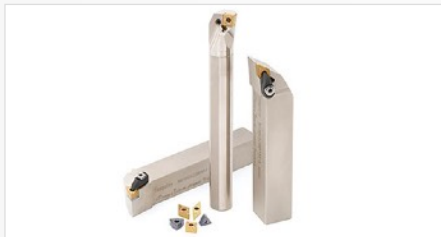

Our Indispensable Values

We believe that values guide the way that we think and the spirit of the company.

OUR PRODUCTS

We are developing time-saving products **that ease your workload.**

Turning

Groove – Turn & Parting

Threading

Hole Making

Milling

Solid Round Tools

Tooling Systems

Clamping Technology

Our Industrial Solutions.

Automotive

Our goal is to provide you with solutions and cutting information that will meet your needs in the areas of quality, reliability and cost per piece.

Aerospace

Move your production in the aviation industry to higher altitudes due to our complete component solutions.

Railway

Our goal is to provide you with solutions and processing information that will meet your needs in the areas of quality, reliability and cost per piece.

Energy

The wide option network and improved qualities provide a serious contribution to the power generation industry.

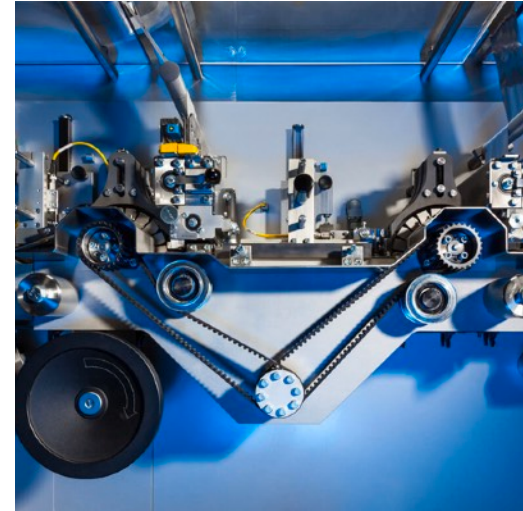

Our Industrial Solutions.

Mould

Try our tooling solutions that we have developed for the mold and casting industry.

Machinery Industry

We offer our extensive tooling knowledge to the service of machine manufacturers and produce industry-specific solutions.

Medical

We provide endless solution and precision for you in different parts used for health.

Miniature Parts

We offer a wide and alternative tooling options for the manufacture of small parts with Swiss-type machines.

RECYCLING & RENEWAL

Working together for a sustainable future.

We can help you make your products and processes greener and more efficient. We consume the world's limited resources in a non-sustainable way and in the long run our raw materials are scarce and finite.

We can reuse the carbide from your worn-out metal cutting tools and make them into new ones. This significantly reduces the need for sourcing raw material and the footprint that our and your operations will leave on the environment.

Your tools are reconditioned to original quality and are delivered back to you within 1-2 weeks.
